

ITU-ML5G-PS-005:Network anomaly detection based on logs

Team Name: Chin

Team Members:

- 1. Qin YuKun
- 2. Song Yong
- 3. Xie Yuchen
- 4. Wei QiangShen

Background

Huge chunks of data was generated by Network Equipment and these information can be used to detect existing faults to improve the network maintenance.

Network Abnormal Detection based on Logs was composed by NLP and typical abnormal detection.

Detals
